

Harmon

An Art Deco style chimneypiece carved in Bardiglio and Red Onyx marbles. This 1930s design revisits the classical architectural canons, re-imagined through the lens of the new machine age. The promise of new technologies drove a new modern style that is perfectly represented in the bold and incisive shapes and in the opulent choice of material of this chimneypiece. The imposing reeded pilaster jambs carved in book-matched flame red Onyx support a lean moulded shelf, expressing a sense of modern age aesthetic.
