

G317

An impactful, late Georgian chimneypiece of Sienna and statuary marbles. With breakfront shelf protruding over the jambs with plain tiered rounded mouldings. The sienna frieze is centred with a plaque of dark red Jasper overlaid with a contrasting statuary swag of oak leaves, in high relief upheld at the sides by tied ribbons on hooks. The plain jambs faced with solid sienna pilasters capped with statuary mouldings and sienna blockings, the whole resting on foot blocks, the opening framed with simple white mouldings.
