

## Antique chimneypiece

A Regency chimneypiece of scale and presence, the whole carved from Belgian Black marble, with fluted Doric columns for jambs. These columns employ entasis, the application of a gentle convex curve to correct the human eye's tendency to see a straight column with a slight concave curve. This resonant piece carries great impact and presence with its architectural nature evoking ideas of a classical temple.

### Dimensions

Height 53½in (135.8cm) width 78¼in (198.8cm)

Internal height 42¾in (107.5cm) width 47⅝in (121cm)

Footblock to footblock 71¾in (182.3cm)

Shelf depth 16½in (42cm)
